

PrEPception

A research study at Northwestern University

Expanding Conception Options for Serodiscordant Couples

Are you an **HIV positive man** who desires to have a baby
with an **HIV negative woman**?

OR

Are you an **HIV negative woman** who desires to have a
baby with an **HIV positive man**?

You may be eligible to participate in a research study about use of pre-exposure prophylaxis or PrEP during conception.

Men must be:

- *HIV-positive in a relationship with an HIV-negative woman*
- *Older than 18 years of age*
- *Partner has chosen to use PrEP for conception after completing counseling with health care provider*

Women must be:

- *Confirmed HIV-negative in a relationship with an HIV-positive man*
- *Between the ages of 18 to 40 years*
- *Has chosen to use PrEP for conception after completing counseling with health care provider*
